

Parking Regulations

Introduction

The Village of Wellington has parking regulations prohibiting parking of vehicles on a public street, over a public sidewalk, in a swale or any landscaped area. Parking in the street or over a sidewalk reduces the visibility of oncoming traffic to pedestrians and other drivers. This can become a hazard for our children when attempting to cross a street because the driver of the vehicle is unable to see a child dart into the street. Our swales provide the necessary drainage for stormwater runoff so that the streets and yards adjoining them do not become flooded. Parking in the swale causes damage that, over time creates drainage problems such as standing water, potholes, and driveway cracking.

The Village of Wellington also has adopted codes for regulating parking of commercial, recreational and sports vehicles, boats and trailers.

Private Communities Parking Enforcement

Private communities may request enforcement of Wellington's parking regulations through a parking enforcement agreement. Please contact the Code Compliance Department for additional information, 561-753-2560.
